Prices effective March 28, 2013, and subject to change without notice. Shipping and Handling not included in above pricing.

We are available for 8:00 a.m. until 4:30 p.m. Central time to provide pricing information and to answer any questions you might have about our products.

ATTENTION! We have had at least 12 reports over the last 15 years of large dogs (shepherds, collies, retrievers, etc.) dropping their tongues through the mesh while under general anesthesia. Serious injury may result if the tongue swells and becomes stuck in the mesh. Personnel must be alerted to this danger and instructed to monitor patients until they become conscious and are able to hold their heads up.
